

TO ALL FEMALE PATIENTS WHO WANT  
INFERTILITY TREATMENT

**WHAT YOU NEED TO DO ONCE YOU HAVE HAD A  
CONSULTATION WITH DR GANDHI:**

1. Please call the clinic on **Day 1(D1)** of your period (first day of flow) and let us know on the phone or leave a message on our voicemail. Please clearly mention **your name, date of birth, phone number and the date and the time when your period started.**
2. Please come to our clinic on **Day 3(D3) of your cycle @ 08:30am**, but make sure you drink **four glasses of water (which you should finish drinking 1 hour before the exam)**. You will need to do blood tests and ultrasounds before seeing Dr Gandhi.
3. Some further tests will be decided by Dr Gandhi and also the date when you will start your Cycle Monitoring, which is usually said to be **Day 10(D10)** of your cycle.
4. On **Day 10** or the day you have been asked to come for Cycle Monitoring, you should be at the clinic @ **07:30 am, for blood Tests and Ultrasounds.** Please do not be late because @ 08:30am, we start D3 patients and if you are late, you could be waiting unnecessarily up to 2hrs.
5. Dr Gandhi will review the test results with you and let you know about further Cycle Monitoring and any procedures, if required.

**Please strictly follow your timings or else you may have to wait unnecessarily.**
